LOCAL NOTICE TO MARINERS

District: 1 Week: 31/13

COASTAL WATERS FROM EASTPORT, MAINE TO SHREWSBURY, NEW JERSEY

NOTES: (1) Unless otherwise indicated, missing and destroyed structures are presumed to be in the immediate vicinity of assigned position, mariners should proceed with caution.

(2) The Local Notice to Mariners consists of a Weekly Edition.

(3) Inquiries, Published Articles or Information: mailto:LNM@d1.uscg.mil

(4) The U.S. Coast Pilot supplements the navigational information shown on nautical charts. (5) The Coast Pilot, along with its corrections, are available online at http://www.nauticalcharts.noaa.gov/nsd/cpdownload.htm.

The Local Notice to Mariners is available online at http://www.navcen.uscq.gov/?pageName=InmDistrict®ion=1
The 2012 Light List is available online at: http://www.navcen.uscq.gov/index.php?pageName=lightLists
Information on Private Aids to Navigation is available at: http://www.uscq.mil/d1/prevention/NavInfo/navinfo/paton.htm
Reports of Channel conditions can be found at the Army Corps of Engineers website at:

http://www.nae.usace.army.mil/Missions/Navigation/MassachusettsProjects.aspx

NOAA Tides and Currents can be found at: http://tidesandcurrents.noaa.gov/.

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: http://cgls.uscq.mil/mailman/listinfo/nanu. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or AIS service. Users are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, mailto: tis-sg-nisws@uscq.mil, or on the internet at: http://www.navcen.uscq.gov.

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

2 MHZ DISTRESS WATCHKEEPING TERMINATION

Effective August 1, 2013, the U.S. Coast Guard will terminate its radio guard of the international voice distress, safety, and calling frequency 2182 kHz and the international digital selective calling (DSC) distress and safety frequency 2187.5 kHz. Additionally, marine information and weather broadcasts transmitted on 2670 kHz will terminate concurrently.

The Coast Guard continues to maintain a continuous watch on VHF FM channel 16 (156.8 MHz) and on existing voice and DSC frequencies in the 4/6/8/12 MHz bands as described in the Coast Guard Navigation Center website http://www.navcen.uscq.gov/?pageName=cgcommsCall.

LNM 25/13

U.S. COAST GUARD MEDIUM FREQUENCY (MF) DISTRESS WATCHKEEPING

Mariners are advised that calls to the U.S. Coast Guard on the international radiotelephone distress frequency 2182 kHz or the Digital Selective Calling (DSC) frequency 2187.5 kHz may not be heard or may be severely degraded. Instead of using 2182 kHz for distress calls, mariners should use high frequency (HF) radiotelephone or DSC in the 4, 6, 8, and 12 MHz distress or calling bands. Additional information concerning U.S. Coast Guard HF watchkeeping is posted on the U.S. Coast Guard's Navigation Center website (http://www.navcen.uscg.gov/?pageName=cgcommsCall).

LNM 11/13

RANGE STRUCTURES-Revised-9/12/2012

The U.S. Coast Guard has become aware that Coast Guard information used to depict a rangeline on NOAA Electronic Navigational Charts (ENC) may not be of sufficient accuracy to accurately portray the rangeline on the ENC. Mariners are cautioned that the position of a rangeline as shown on an ENC may not reflect its true position.

The following D1 ranges were highlighted as having potentially questionable positions:

(Charts 13229 13230 13236) Cleveland Ledge Channel Range Front Light (LLNR 16085) Cleveland Ledge Channel Range Rear Light (16090)

(Charts 12377 12378)

Connecticut River Range C Front Light 40 (LLNR 22990)

Connecticut River Range C Rear Light (22995)

Connecticut River Range G Front Light 116 (LLNR 23220)

Connecticut River Range G Rear Light (23225)

Connecticut River Range J Front Light 116 (LLNR 23270)

Connecticut River Range J Rear Light (23275)

The Coast Guard is in the process of investigating this information and if necessary, surveying the ranges to correct the discrepancies.

ENDANGERED NORTHERN RIGHT WHALES

US - ATLANTIC SEACOAST — Critically endangered Right Whales may be encountered in offshore and coastal waters. Right whales are slow moving and at risk of serious injury or death due to collisions with vessels. Beginning December 9, 2008, U.S. law (50 CFR 224.105) prohibits operating vessels 65 feet (19.8 M) or greater in excess of 10 knots in specific managed locations along the U.S. East Coast during times when right whales are likely to be present. See enclosed "Compliance Guide for Right Whale Ship Strike Reduction Rule" for specific times, areas, and exceptions to this law. Intentionally approaching within 500 yards of right whales is prohibited and is a violation of U.S. law. A minimum distance of 500 yards must be maintained from a sighted whale unless hazardous to the vessel or its occupants. NOAA recommends that operators assume that any whale sighted is a right whale. NOAA also recommends speeds of 10 knots or less in areas used by right whales and outside of seasonally managed areas when consistent with safety of navigation. The compliance guide is available at:

(http://www.nmfs.noaa.gov/pr/shipstrike/compliance_quide.pdf). In the northeast, please report all right whale sightings to 978-585-8473 and all collisions to 978-281-9351, telex #48156090 or to the Coast Guard via channel 16.

Vessels that report MSR arrivals via TELEX must use the new number (#48156090) effective immediately. The existing INMARSAT email address currently in use (rightwhale.msr@noaa.gov) remains active. For more information, consult the U.S. Coast Pilot.

NY/NJ - OPERATION CLEAR CHANNEL IN THE PORT OF NY/NJ

The Operation Clear Channel program is designed to educate boaters about the hazards of navigating small vessels and personal water craft in the confines of the navigational channels used by larger commercial ships that enter and depart the various ports in New York Harbor. The Federal navigation rules, also known as the "Rules of the Road", address this safety concern by giving commercial vessels priority, or right-of-way, over smaller vessels when navigating in narrow channels. Every day an average of 1,400 commercial vessels navigate the waters of the Port of NY/NJ. The masters of these vessels, while always on the lookout, cannot always see smaller vessels when they cross the channels. For safety reasons, recreational boaters should keep a sharp lookout for other vessels and always be prepared to give way to ships constrained in their ability to maneuver when transiting within close proximity to a channel. Coast Guard units in New York and New Jersey actively promote boater awareness through vessel enforcement patrols and visits to local marinas. The Coast Guard targets high-traffic regions, such as Ambrose Channel, Sandy Hook Channel and Raritan Bay, but also includes all of New York Harbor. Mariners interested in increasing their knowledge of boating safety, including the Rules of the Road, should consider a Coast Guard Auxiliary boating safety course. Course information is available online at http://www.cgaux.org in the "Take a Boating Course" section, or by calling 1-800-336-BOAT. Further information can be found at http://thesafeharbor.us/index.html.

SAFE BOATING VIDEO FOR THE PORT OF NY & NJ

This free online educational resource for safe boating in the Port of NY & NJ is a cooperative effort by the I BOAT NJ program through NJ DOT and USCG Sector NY. The project contains a feature length 26 minute safety video describing the challenges of the multi user Port environment and 5 sub chapters: Paddlers, Motor Boaters, Sailors, Pilots and Operation Clear Channel. Its mission is to increase safety and awareness in the Port and its target is recreational boaters who transit and operate in the Port. It can be found online at http://thesafeharbor.us/index.html. Please distribute far and wide.

US NOTICE TO MARINERS (NTM)

The US Notice to Mariners provides timely marine safety information for the correction of all US Government navigation charts and publications from a wide variety of sources both foreign and domestic. To ensure the safety of life at sea, the information published in the Notice to Mariners is designed to provide for the correction of unclassified nautical charts, the Unclassified NGA/DLIS Catalog of Hydrographic Products, United States Coast Pilots, NGA List of Lights, USCG Light Lists, and other related nautical publications produced by NGA, NOS and the USCG. The US Notice to Mariners will contain only those chart corrections of interest to ocean going vessels. It is available online at http://msi.nga.mil/NGAPortal/MSI.portal?nfpb=true&pageLabel=msi-portal_page61. NTM 01 – Special Paragraphs includes information on: America's Waterway Watch program asking those who work, live, or recreate on or near the water to be aware of suspicious activity, The Prudent Mariner and the use of floating Aids to Navigation, and Northern Right Whales.

LNM 02/12

USCG's BOATING SAFETY DIVISION

The U.S. Coast Guard's Boating Safety Division (CG-5422) is dedicated to reducing loss of life, injuries, and property damage that occur on U.S. waterways by improving the knowledge, skills, and abilities of recreational boaters. Additional information, including Recalls and Safety Defects, is available at http://www.uscgboating.org and at http://marineinvestigations.us.

NY-LONG ISLAND-MARINE SAFETY ALERT (MILITARY MUNITIONS)

Recently, a commercial fishing vessel dredging for clams in about 200 FSW in the vicinity of Hudson Canyon, approx. 45 NM south of Long Island, New York reportedly recovered 8 liquid–filled munitions believed to be 75mm projectiles chemical munitions (circa 1919). As a result, a crewman was hospitalized due to chemical exposure, the fishing vessel was quarantined for several days and the catch was destroyed. Incidental recovery of munitions or munition components during commercial and other activities (channel dredging) occurs occasionally. Any such inadvertent recoveries or the intentional recovery or handling (disturbing) of underwater munitions (e.g., during scuba or free diving) can have life-threatening results. Marine growth can make munitions hard to identify. Thus, any munitions, unknown or unidentifiable objects should be carefully, but immediately, discarded overboard and the coordinates of the harvest and re-disposal area promptly reported to the U.S. Coast Guard.

The U.S. Army's 3Rs Explosives Safety Guide (Maritime Industry) is available at the following URL www.denix.osd.mil/portal/page/portal/UXOSafety/EducationalResources/SafetyGuides. Its core message is, Recognize that an item might be a munition, Retreat by separating personnel and the vessel from the item, and Report the encounter. The safety guide provides useful imagery to assist in recognizing munitions and recommended actions.

Given the recent event, the Coast Guard strongly recommends

- any persons involved in commercial fishing industries and any similar activities, review current "Notices to Mariners" and update their navigational charts to ensure "Explosives Dumping Areas" are properly marked and identified, and that all vessel operators know to give these areas wide berth when towing bottom-contact gear,
- mariners review 3Rs material from the URL above, and
- vessels report any encounters immediately to the National Response Center at 1-800-424-8802 for proper response. (Alternatively, the USCG may be notified via channel 16)

This safety alert is provided for informational purposes only and does not relieve any domestic or international safety, operational, or material requirement. Please visit http://fishsafe.info for additional fishing safety information.

CODE OF FEDERAL REGULATIONS -TITLE 33 PART 70 - INTERFERENCE WITH OR DAMAGE TO AIDS TO NAVIGATION

No person, shall take possession of or make use of for any purpose, or build upon, alter, deface, destroy, move, injure, obstruct by fastening vessels thereto or otherwise, or in any manner whatever impair the usefulness of any aid to navigation established and maintained by the United States. Recently several offshore NOAA data buoys parted their moorings and became adrift due to excessive strain on the mooring. These navigational data buoys collect valuable on scene weather data for all mariners. These buoys are anchored to the seabed, and some have a watch circle radius of over 1 nautical mile. Once the mooring is parted and the buoy is adrift only certain Coast Guard resources can reset the aid back on its intended station. Coordinating of resources to retrieve the buoy, and place it back on station is time consuming and sometimes take weeks, thus valuable weather information cannot be obtained and relayed to mariners in need of it. Mariners are advised not to interfere with these aids to navigation and report any sightings of vessels tied off to them to the U.S. Coast Guard. Interference with or intentional damage to Aids to Navigation is a misdemeanor and shall be subject to a fine not exceeding the sum of \$500 for each offense (33 CFR 70.01).

LNM 44/07

NOTICE TO ALL PRIVATE BOATS AT SEA

United States laws and regulations require that ALL private boats arriving from a foreign port or place MUST report to the Bureau of Customs and Border Protection IMMEDIATELY upon their arrival into the United States. Every person entering the United States must be seen in person for immigration purposes by a Customs and Border Protection officer, except those participating in the I-68 -Canadian Border Boat Landing Program-. However, holders of form I-68 are still required to report their arrival into the United States to the Bureau of Customs and Border Protection. Masters and passengers must provide proof of citizenship or legal immigration status, and be in possession of a valid passport and visa, if required. Citizens of countries that are participants in the Visa Waiver Program are not eligible to seek admission to the United States under that program via private vessel. Once your boat is anchored or tied, you are considered to have entered the United States. No one may leave the vessel until Customs and Border Protection grants permission. The only exception to this requirement is to report arrival. In order to fulfill the requirement to immediately report a private boat arrival, the master of the vessel must contact the nearest Customs and Border Protection Office, or if the arrival occurs after business hours, the nearest 24 hour port of entry. Upon reporting, you may be required to proceed to a staffed port for inspection by Customs and Border Protection. Failure to comply with these requirements could result in serious criminal and civil penalties, including seizure of the boat. International mariners are urged to report any suspicious or illegal activity to the Bureau of Customs and Border Protection at 1-800-BE-ALERT.

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

NOTICE OF LIGHTERING OPERATIONS-COTP NEW YORK ZONE

- 1. In order to increase situational awareness within the port, vessels intending to conduct lightering operations outside of Vessel Traffic Service New York (VTS) managed anchorages (Anchorage 21A, 21B, 21C, 23A, 23B, 24 and 25) shall notify the VTS Watch Supervisor at (718) 354 -4088 of the time and place of the planned lightering operation at least four hours in advance of the transfer in accordance with 33 CFR 156.118 (b).
- 2. Vessels conducting lightering operations within VTS managed anchorages (Anchorage 21A, 21B, 21C, 23A, 23B, 24 and 25) must notify VTS before beginning and at the termination of lightering operations in accordance with 33 CFR 110.155 (d) (16), but four hour advanced notice is not required.
- 3. According to 33 CFR 156.205, lightering operations means the transfer of a cargo of oil or a hazardous material in bulk from one vessel to another, including all phases of the operation from the beginning of the mooring operation to the departure of the service vessel from the vessel to be lightered, except when that cargo is intended only for use as a fuel or lubricant aboard the receiving vessel.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

NY/NJ-ARTHUR KILL

The US Coast Guard promulgated a temporary interim rule amending its prior temporary interim rule establishing a regulated navigation area (RNA) on navigable waters of the Arthur Kill in New York and New Jersey. The first temporary interim rule was prohibited vessels from approaching closer than 150 feet from all US Army Corps of Engineers (USACE) drilling and blasting equipment and extended through April 1, 2014. This second temporary interim rule allows the Coast Guard to suspend enforcement of some RNA requirements when they are found to be impracticable and unnecessary. The amendments come into effect immediately. Comments on the amendments should be submitted by April 1, 2014. 77 Fed. Reg. 1023 (January 9, 2012) http://www.gpo.gov/fdsys/pkg/FR-2012-01-09/pdf/2012-108.pdf.

NH-PORTSMOUTH

Smith Marine Inc. will begin conducting preconstruction geotechnical surveys to determine subsurface conditions of the Piscataqua River in the vicinity of the Sarah Mildred Long Bridge in Portsmouth, NH. These tests will help ensure the designers utilize properly-sized piers and supporting foundations for the new bridge.

This geotechnical work is scheduled to take approximately 6 weeks to complete. The testing operations will be conducted by small drilling rigs starting the week of July 29, 2013. The test-boring operations will run from 6:00 a.m. to 10:00 p.m. on Monday through Friday.

While most of the work will be conducted outside of the main navigation channel, eight of the proposed test boring locations will be within the limits of the federal navigation channel. Mariners are advised to transit the main channel carefully, reduce wake and exercise extreme caution when transiting the area.

For additional information concerning this project, please contact Mr. Matt Plauche with Smith Marine Inc. at (978) 375-4129 or matt@smithmarineinc.com

NJ-NARRAGANSETT BAY, POPASQUASH NECK - MOORED BARGE ADJACENT TO COLT STATE PARK FISH PIER

From August 1 to August 31, 2013, a 50' X 200' spud barge with a crane onboard will be moored by the fish pier at Colt State Park, North Point, Popasquash Neck, Bristol, RI. A contractor for the Rhode Island Department of Environmental Management (RI DEM) will be making improvements to the fish pier.

The barge will not extend approximately into the adjacent navigable channel. The barge will be lighted at night by four white lights mounted on each corner, with a minimum visibility of one nautical mile.

The contractor for RI DEM is Cardi Corporation, whose on-site project manager is Mr. Albert Noviello who may be reached at 401-641-8453.

Mariners should use extra caution when transiting in the vicinity of the moored spud barge at Colt State Park from August 1 to August 31, 2013.

and monitored by a three-person crew aboard the Northeast Work & Safety Boat's 24' aluminum custom Lobel with pilot house & 150 hp outboard, CHARLES D. CASEY, DL#084332. Appropriate flags will be displayed while divers are underwater. Crew aboard the CHARLES D. CASEY will be monitoring VHF channel 16 at all times during diving operations.

The main channel of Seekonk River Channel will remain open to vessel traffic.

The project point-of-contact is Mr. Chris Perry of Collins Engineering, who will be on-site and can be reached via cell phone at 860-719-2153.

The Resident Inspector for the RI Department of Transportation is Mr. David Fish who can be reached at 401-222-2053, x4022.

Mariners are urged to use extreme caution when navigating the Seekonk River Channel in the vicinity of the Washington North & South Bridges during these underwater inspection operations.

NJ/NY-LOWER NEW YORK BAY-ATLANTIC OCEAN

Ocean Surveys will be taking vibratory core samples in Lower New York Bay and the Atlantic Ocean from Jul 22 to Aug 1, 2013. Work hours are 0600-1800, seven days per week. Each sample will be taken from the L/B VISION (70'x24'). Each sample is expected to take 1.5 hours to complete. The vessel can move within 20 minutes to not impede commercial navigation with notice via CH 13. The L/B VISION will notify Vessel Traffic Service New York (VTSNY) on VHF CH 14 fifteen minutes prior to starting each sample and upon completion of each sample within the VTSNY Area of Responsibility. Four of these samples will be taken within Federal Channels at the following points: 40-28-51.72"N, 074-04-00.25"W (Raritan Bay East Reach); 40-29-14.41"N, 074-02-49.40"W (Chapel Hill South Channel); 40-29-44.14"N, 073-59-29.73"W (Swash Channel); 40-30-13.57"N, 073-57 18.99"W (Ambrose Channel). VTSNY will give final approval for these four locations based upon vessel traffic at that time. The Ambrose Channel sample is scheduled to be taken on Sunday, Jul 28th beginning around 1000-1100 and will be closely coordinated with VTSNY. Liquid Robotics, Inc. will continue 24/7 autonomous, unmanned maritime vehicle (www.liquidr.com) operations from 4-Feb through 31-Aug-2013. Vehicle deployed 4-Feb-2013 in the vicinity of 40° 12.26'N, 70° 51.53'W to conduct scientific data collection operations. Operations consist of surveying this region and 39° 29.72'N, 71° 25.79'W for 2-3 week intervals making best speed while transitioning between them prior to recovery. Wave Glider is remotely operated, propelled under its own power, remotely attended from our Wave Glider Operations Center (WGOC), moving at speeds of ~1kt, and designed to "lose" should a conflict occur with any vessel. They are approximately 6.5' x 2' (surfboard size), black in color, with a contact plaque and mast extending 1 meter above the water surface supporting a flag. Mariners are advised to use caution when transiting the area. Dredging will be done in New Bedford Upper Harbor from June 1 - December 30, 2013. The work will be done 7 days a week, from 6:00 am - 8:00 pm. Two dredge control systems consisting of steel piles and multiple wire rope cables are being deployed and will be maintained in the upper harbor of New Bedford Harbor. Two floating dredges will be operating within the perimeter of the pilings. The northern-most system is across the entire width of the Acushnet River at approximately (lat,long) -70.919, 41.667 to -70.916,41664). The southern-most system is across the entire width of the Acushnet River at approximately (lat,long) -70.918, 41.662 to -70.915, 41.662. north of the Route 195 and Coggeshall Street Bridges. At high tide, the traverse cable system will be nominally 1ft above the water's surface. A floating white oil boom is attached to piling as well as blinking lights located at the top of several pilings. The dredges are connected to a booster pump station on the west side of the Acushnet River via floating 10 and 12 inch pipelines. The dredge line continues south and crosses Pierce Mill Cove (Coffin Cove) blocking access to the cove. The dredge lines are nominally submerged at the water surface and marked approximately every 500ft with buoys. Mariners are urged to use extreme caution in this area and if transit is desired, hail on VHF Channel 77 or contact the dredges on VHF Channel 13/16 to coordinate the passage and proceed with caution after passage arrangements have been made with the dredges.

On November 4, 2010, one sub-tidal research area comprised of rock and other hard natural materials was installed in the Lower Bay. Each structure is approximately 15 feet by 30 feet and 1 foot in height. The position of the research area is:

- In Old Orchard Shoal, project position is 40° 31′39″N, 74° 07′37″W approximately 2 feet below the surface at lower low water. An unlighted mooring buoy attached to a 3feet tall mushroom anchor will be in the research area.

This project will last until December 31, 2013. Mariners are urged to use caution while transiting this area.

Project POC is Kerstin Kalchmayr at (732)-888-9870.

CT-HOUSATONIC RIVER

The Coast Guard is establishing a regulated navigation area (RNA) on the navigable waters of the Housatonic River surrounding the Interstate 95 (I–95) Bridge, between Stratford and Milford, CT. This RNA allows the Coast Guard to enforce speed and wake restrictions and prohibit all vessel traffic through the RNA during bridge replacement operations. This rule is effective and will be enforced from January, 7, 2013 through November 30, 2017. 78 Fed. Reg. 1145 http://www.gpo.gov/fdsys/pkg/FR-2013-01-08/pdf/2013-00211.pdf (January 8, 2013).

MA-MARTHA'S VINEYARD/NANTUCKET, MUSKEGET CHANNEL

Recent soundings by Coast Guard vessels in the vicinity of the southern entrance to Muskeget Channel show observed water depths that are significantly shallower than charted depths. The National Oceanic and Atmospheric Administration (NOAA) will confirm these soundings during its next regularly scheduled survey of Muskeget Channel. Mariners are urged to consider these observed depths and use particular caution when navigating in the vicinity of the southern entrance to Muskeget Channel.
